

For Examinations

- A very comprehensive module for defining a question bank for exam questions
- Exam questions can be multiple choice, short or long answer. They are classified subject wise and chapter-wise, and in easy, medium and difficult categories
- An exam paper can be auto-generated with random questions, only by specifying how many easy, medium and difficult questions to include from each chapter
- Teachers can easily enter formatted questions and attach scanned diagrams / pictures
- Students can also easily enter formatted replies to short and long answer questions, and attach a diagram / picture.
- Multiple choice exams are auto-graded by the system and the result is available instantly. Short and long answer questions are submitted to the teacher for grading
- The complete annual / semester grade of the student is made on-line, including attendance, assignments, mid-term and final exam results based on the teacher-defined weightage
- Supervisors can supervise groups of students for remote exams through video call. They can communicate with or warn students and enter remarks on the progress of the exam.

OgoulLMS

An E-Learning platform that digitizes the traditional educational experience offered by the schools.

About OgoulLMS

OgoulLMS is an educational platform that enables classroom learning virtually over the Internet. Due to its scalability, flexibility and convenience, an Online Classroom Management System results in effective learning experiences and results. OgoulLMS is committed to transforming the way education is imparted and received, making it accessible to anyone from any part of the world.

What we do

OgoulLMS is an internet-based electronic learning and classroom solution made exclusively for modern schools. It has built-in tools and resources that simplify the operations of an educational institute and enhance pedagogy. These tools help in administration, documentation, tracking, reporting, automation and delivery of educational courses, training programs, or learning and development programs. The main objective of this system is to host and track online learning. It enables the teachers and administrators to automate the mundane tasks that can detract educators from focusing more time on improving their syllabi and class engagement. It also enhances the learning process for learners by providing clarity in instructions and universal access to e-learning content. It provides visibility of operations to all the stakeholders including parents enabling a complete ecosystem of learning.

“ AN ONLINE EDUCATION TRAINING AND LECTURE DELIVERY SOLUTION. ”
